

badgerai-skeleton/include/Hawk.h

```
graph TD; A[badgerai-skeleton/include/Hawk.h] --> B[Game.h]; A --> C[GameState.h];
```

The diagram illustrates a header file inclusion relationship. At the top, a grey rectangular box contains the text 'badgerai-skeleton/include/Hawk.h'. Two blue arrows originate from the bottom center of this box and point downwards to two separate white rectangular boxes. The left box contains the text 'Game.h' and the right box contains the text 'GameState.h'. This visualizes that Hawk.h includes both Game.h and GameState.h.

Game.h

GameState.h
